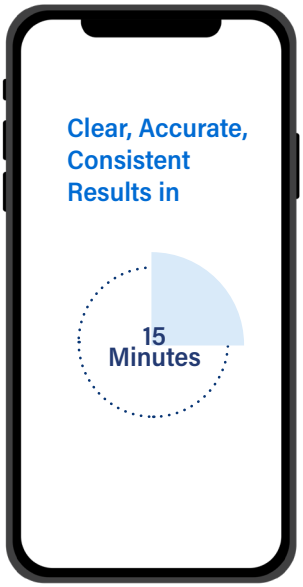
Rapid Bio

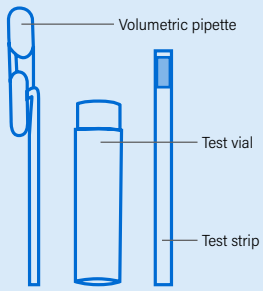
Total Aerobic Bacteria Test Kit

A Smarter way to stay ahead of bacteria in your water

Rapid Bio represents a significant step forward in field-based aerobic bacteria testing:

- **Immediate:** Rapid Bio yields clear results in just 15 minutes, compared to traditional field-based tests which require 48 hours or more to complete
- **Accurate:** Rapid Bio test results (CFU/mL) are delivered by the Nalco Water E-data mobile app for greater consistency and reliability, when used as instructed
- **Actionable:** With results in minutes, you can react efficiently and effectively to microbiological upsets in your water system



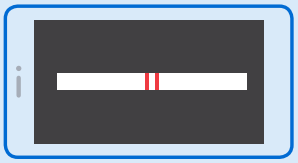


1

Prepare the test kit materials

2

Perform the test



3

Read your results

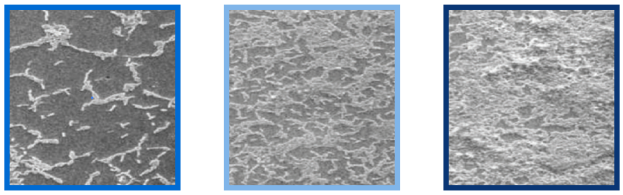
4

Take action as needed

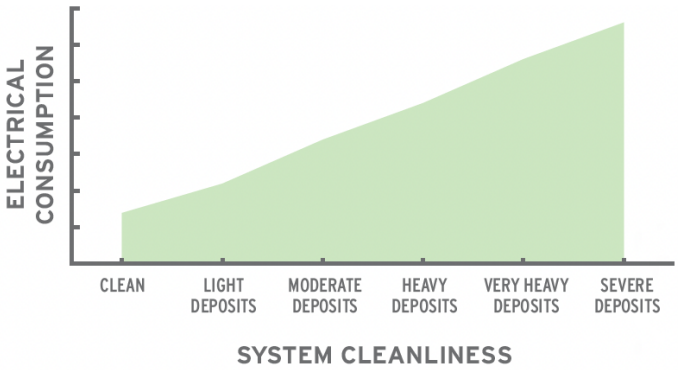
The Risk of Rising Bacteria Levels

If left untreated, populations of waterborne bacteria can double in as little as 20 minutes. Efficiency losses associated with increasing bacteria and biofilm growth can result in **10–30 percent more energy consumption.***

Surface Bacteria Growth Over Time



24 hours | 72 hours | 96 hours



Keep Bacteria at Bay

Rapid Bio test strips are read electronically with the Nalco Water E-data mobile app to help ensure consistent and accurate results.

Track Results Over Time

Nalco Water E-data can also securely store your test results via ECOLAB3D™, enabling you to track and visualize historical data, and identify peak periods of aerobic bacteria levels. The data is readily accessible in your ECOLAB3D account, eliminating the need for other logging methods.
