

MITIGATING COVID-19 RISKS

PROTECT YOUR HOTEL AND YOUR REPUTATION

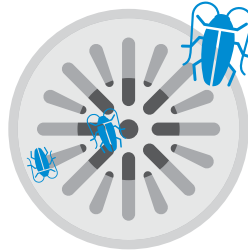

As businesses welcome guests to their facilities, Pest Elimination is especially critical due to heightened public sensitivity to cleanliness and increased social media activity. Under current conditions, a pest sighting is a risk your brand can't afford.

Ecolab Pest Elimination is at the forefront of ensuring the highest standards of food safety, facility safety, sanitation and public health. With our proven, science-based expertise we are committed to helping you create a safe, healthy and pest-free environment.

LEFT UNATTENDED, PESTS CAN QUICKLY INFEST YOUR HOTEL LOCATIONS

Bed Bugs are human parasites that can survive 6-12 months without food and are a concern for 80% of travelers.¹

Cockroaches spread bacteria and are associated with dirty, unsanitary environments.

Rodents are known to spread disease. They damage reputations as well as food inventory & building structure.

ECOLAB'S HOTEL PROTECT PROGRAM FOR HOTELS

Ecolab's Hotel Protect program uses an outside-in, proactive approach to pest management because we know that keeping pests out of your facility is the first step to an effective pest program. Our program provides comprehensive protection against common pests and proactive defense against bed bugs.

ADDITIONAL SOLUTIONS TO HELP PROTECT YOUR HOTEL AND SAFEGUARD YOUR STAFF AND CUSTOMERS

ECOLAB DISINFECTION SERVICE

Ecolab's uniquely designed, short contact time disinfectants have been rigorously tested and EPA-approved for specific surfaces. Reliable service performed by highly trained Service Specialists.

MATTRESS ENCASEMENTS

Ecolab offers CleanRest Pro mattress encasements which will protect your hotel from costs like mattress replacement, remediation, and lost bookings. Additionally, the encasements meet the level 4 CDC classification for medical gowns and masks, meaning that encasing mattresses and laundering the encasements between guests will offer a safe and healthy mattress for your guest.

ECOLAB PEST CLEAN OUT SERVICE

Ecolab's pest elimination experts provide focused clean out treatments to remedy established pest activity. This is particularly useful if your facility has been shut-down or operating at a limited capacity.
